Hire of Trench Shoring System per week (Based on 5-day week). (Subject to availability)	YES	711.00	N

WHITSUNDAY REGIONAL COUNCIL WATER QUALITY TESTING LABORATORY

Whitsunday Regional Council has a laboratory that can provide quality analysis of water and waste water. This analysis is conducted by qualified scientific laboratory staff located at the Proserpine Water Treatment Plant. Council's commitment is to provide customers and the community with safe, reliable and high quality drinking water and also help identify quickly any health hazards related to water especially to untreated drinking water sources such as bore water or water from rain water tanks. Our scientific staff conduct regular comprehensive water monitoring through sampling and testing at designated points throughout the water distribution system. The operational staff is then provided with the results for assessment to ensure the highest level of water quality.

OUR SERVICE

The laboratory provides testing services Monday to Friday between 8:30 AM and 4:30 PM. Upon request the laboratory team can collect at extra cost water and sewerage samples from interested customers. The samples collected in appropriate sampling containers to preserve the components of the water samples requiring analysis are taken back to the laboratory and analysed within 24 hours from collection.
